

## Cellulose High Build Primer

### **Description**

A high-build, quick drying and flexible primer, great for smoothing out imperfections. It is not suitable for bare surfaces (metal, plastic or fibreglass.)

### **Mixing Ratio**

Your primer will already have been thinned 50:50 with cellulose thinner, unless you have requested otherwise.

### **Application**

Ensure all surfaces are clean, dust free and have been degreased.

Air cap: 1,4 - 1,6 mm

Apply 2- 3 light coats.

Allow 10-15 minutes between coats

Thorough drying in 1 hour.

Rub down lightly with 800 sandpaper.
